

Slope orchestrates the entire biospecimen lifecycle for sponsors, with software that research sites love

Traditional sample management solutions fail to drive site adoption, nor are they able to address a significant source of deviations, delays, and inflated budgets: insufficient inventory for patient visits, lab kit waste, sample mishandling, and preventable data discrepancies.

This is why **Slope's Biospecimen360™ software, data, and tech-enabled services** offer real-time oversight of the entire biospecimen lifecycle from lab kit to destination lab, ensuring the highest levels of compliance, efficiency, and data quality, while standardizing operations and sample metadata across sites and labs.

SLOPE ENABLES

- Unparalleled site adoption, including nearly 80% of NCI-designated cancer centers and counting
- Sustainable, efficient lab kit management
- Software-guided workflows that facilitate sample collection, processing, storage, and shipment
- Streamlined data entry and quicker visibility to sample metadata for sponsors, CROs, and labs
- A more robust monitoring strategy
- Standardized operations across all study sites

The Slope difference

We offer tech-enabled services that help sponsors transform their biospecimen data into actionable insights

We save sponsors thousands of dollars on lab kit waste

We drive site compliance by orchestrating site activity

We fill in common gaps in sample tracking

We're vendor-agnostic and don't force devices onto site users

We built our platform with sites, and support independent site adoption

We bring together inventory and sample management

Biospecimen360™ is unrivaled in its ability to simultaneously manage lab kits, patient samples, and biospecimen data — stopping compliance issues in their tracks and surfacing essential sample metadata within 3.8 hours of sample collection.

Slope checks all the boxes

FEATURES	 Biospecimen360™	Sample Management / Tracking Point Solutions	Central Lab Management Tools	Data Aggregators
Sample management reporting & analytics	✓	✓	—	—
Professional services supporting lab & biospecimen ops, sample tracking, and data management	✓	×	—	—
Vendor-agnostic	✓	✓	×	✓
EDC integration	✓	×	×	✓
LIMS integration	✓	✓	—	×
Site-facing sample management platform	✓	✓	—	×
No proprietary devices required for sites (pens, etc.)	✓	✓	—	✓
Replaces lab manuals with software-guided workflows	✓	—	×	×
Inventory management platform with precise data-driven resupply	✓	×	—	×
Independent site adoption	✓	×	×	×
Accessible via web browser on any device	✓	×	—	×
Same-day tracking, with built-in flexibility to accommodate site processes	✓	×	—	—
