Powerful integrations that connect everything and everyone
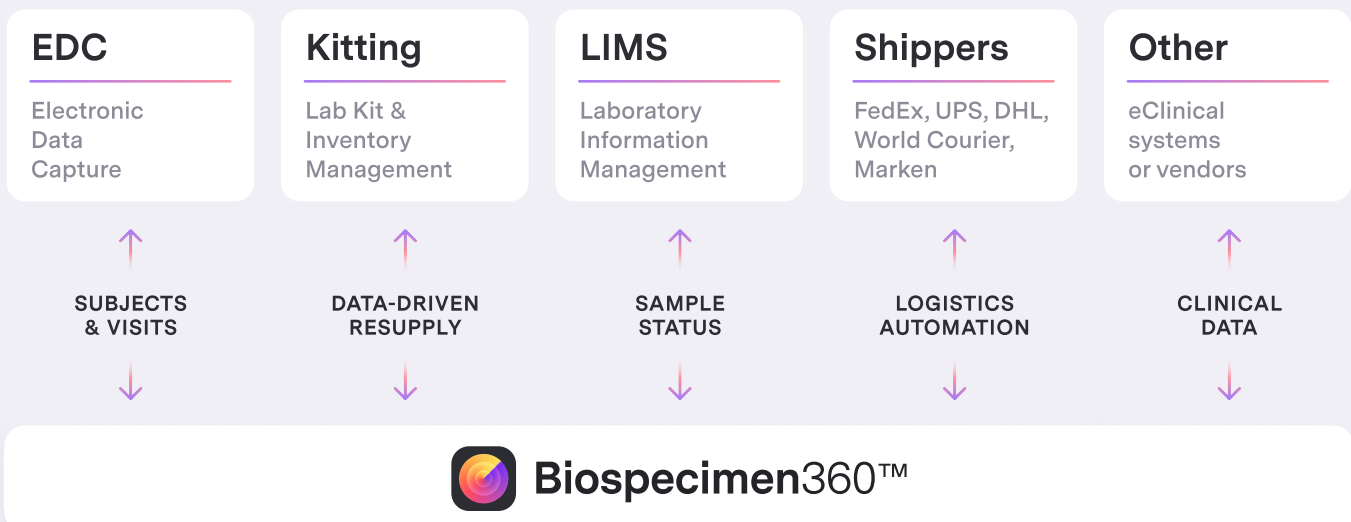

Slope's Biospecimen360™ software transforms study execution by connecting systems and study stakeholders to direct site operations and drive real-time, traceable, and operational clinical data. By syncing information across vendors and eClinical systems including **EDC, IRT/RTSM, kitting, LIMS, shippers, and other systems,** critical data surrounding inventory and sample management becomes accessible and actionable anytime — strengthening data integrity, empowering decision-making, and accelerating clinical research timelines.

→ Streamline reconciliation

↘ Reduce inbound queries

✓ Alleviate site burden

Easily integrate with any API-enabled system.

Trigger automations based on protocol-specific events or transactions.

EDC / IRT

⚡ Patient creation   ⚡ Visit creation   ⚡ Every X minutes

⚡ Samples registered   ⚡ Patient visit conducted

SHIPPERS

⚡ Shipments created   ⚡ Transit updates

⚡ Shipments delivered

LIMS

⚡ Samples shipped   ⚡ Sample status

⚡ Samples received   ⚡ Samples analyzed & resulted
